### *OUR PRODUCT RANGE*

**HAMILTON  
MEDICAL**  
Intelligent Ventilation since 1983

#### **Hamilton-MR1**

Fully featured ICU ventilator able to be used at a magnetic field strength of up to 50mT.

#### **Hamilton-T1**

A robust, compact and portable critical care ventilator, providing optimal ventilation therapy to patients in pre-hospital, emergency and transport applications.

#### **Hamilton-C6**

Modular, mobile and easy to use intensive care ventilator, with advanced features to meet the respiratory care needs of your most complex patients.

 **corpuls®**

#### **Corpuls CPR**

A mechanical CPR device, suitable for paediatric and bariatric patients aged 8 and upwards.

#### **Corpuls3T**

A robust modular monitoring and defibrillation device, offering telemetry and remote monitoring solutions.

### Mostcare Up

Continuous cardiac output monitoring made easy. Real-time, beat by beat monitoring to detect the slightest variation in patient haemodynamics.

### Leadercath

A catheter specifically designed for arterial pressure monitoring.

### Arteriosel

A bloodless system for arterial cannulation, using the Seldinger technique.

### Aerogen Solo and Ultra

High-performance aerosol drug delivery system for use with all respiratory modalities.

### Sapphire Multi-Therapy

A multi-purpose infusion pump, designed to adapt to the varied needs of the pre-hospital, hospital and ambulatory patient.

### Sedaconda

Designed for simple and efficient anaesthetic delivery of isoflurane and sevoflurane to ventilated patients.
